DIRECTIONS FOR USE WITH DRY FERTILIZER

Use 0.25 gallons EZ-N per 1 Ton of granular Nitrogen Fertilizers. For uniform blending, use a blender with impregnation equipment.

Before spraying EZ-N all Nitrogen fertilizers need to be properly weighed and transferred to mixing or blending equipment. If nitrogen fertilizer is wet, wait until it has dried before transferring to mixing/blending equipment. Before mixing, allow for adequate ventilation and air movement. Once transferred, measure out the amount of EZ-N needed for application (0.25 gallons per 1 Ton of nitrogen fertilizer) and spray evenly in the blender over nitrogen fertilizers. Allow adequate drying time before introducing other fertilizer materials (1 minute per 1 Ton).

DIRECTIONS FOR USE WITH LIQUID FERTILIZER
